

Sending Messages With Light and Sound

HAVE FUN!

By Jennifer Boothroyd

DISCUSS

Talk through your thoughts.

- Talk about how you use light. Look around your home. Count the lights.
- Talk about how sound is part of your everyday activities. What is your favorite sound? Least favorite sound?

CREATE

Make an experience of your own.

- Send a message using sound or light. Did it work?
- Use your senses to play a game with a friend. One person closes their eyes and the other makes a sound and you guess what is making the sound. Can you do this with smell? Touch?

IMAGINE

Use your imagination to explore.

- Use your hands and light to create shadow puppets. Can you make an animal? A letter? Number?
- Learn how to use sign language. With permission, use the Internet to help you.
